

AVERAGE PITOT TUBE

This complete assembly comprises a D.P. Transmitter for 4-20mA analog output & an averaging pitot tube assembly as a primary flow sensing elements.

A most reliable & economical instrument for low measurement of Gas, Liquid & Steam application:

SPECIFICATIONS :

*	Choice of linear or square root output.
*	A/D or D/A converter not required as the electronic unit can be directly hooked up with the control system.
*	Piezo resistive sensor for temperature & pressure compensation.
*	Programmable engineering units for display.
