

## DIAPHRAGM PRESSURE GAUGE

The diaphragm pressure gauge consists of a circular membrane, made from sheet metal of precise dimensions, which can either be flat or corrugated.

The diaphragm is mechanically connected to the transmission mechanism which will amplify the small deflections of the diaphragm and transfer them to the pointer.

## SPECIFICATIONS :

<b>Dial Size (mm)</b>	:	65 mm, 100 mm, 150 mm, 200 mm
<b>Mounting</b>	:	Bottom
<b>Connection</b>	:	1/8", 1/4", 3/8", 1/2" NPT/BSP Flange/TC
<b>Case</b>	:	SS304
<b>Movements</b>	:	SS316
<b>Range &amp; Unit</b>	:	as per requirement
