FOOD & BEVERAGES

The volume of food and beverages production has multiplied many folds and this could not have happened without automation. From processing raw ingredients to packaging and transportation of end products, optimized efficiency and cost plays major factor to be competitive. At Wfsipl, experience over the years has given us understanding of the specific requirements of this industry. Incidentally Wfsipl control started the business by manufacturing bottle washing systems, crater and de-crater, filler and palletizer in beverage industry.

Our system includes

- Conveying and processing
- Batch production
- Automated packaging
- Power & Utilities management

SPECIFICATIONS :

Automation will continue to transform food and beverage manufacturing companies throughout the supply chain and to their customer's door. To fulfill their promises to customers, companies need to be agile, efficient, and safe. Integrating automated equipment in critical areas of production improves quality, efficiency, ergonomics, and sanitation.
