

MULTIGAS ANALYZER

Multi Gas Analyzer BI 7400 is designed to meet the needs of various industrial process with combination of technologies. The technology employed is tried and tested to ensure the user experiences maximum reliability and accuracy.

Up to six gases can be analyzed simultaneously with scalable ranges for each gas. BI 7400 is an ideal solution to protect initial investment & long lasting performances.

SPECIFICATIONS :

Operating Temperature	4°C to 65°C
Analog Output	4-20mA
Digital Interface	RS 485, MODBUS
Relay Output	2 Nos. potential free contacts for alarms
Power Supply	110/230 VAC, 50 Hz

Features:-

- 32-Bit Cortex-M3 ARM Processor
- 5.7" Colour TFT Display
- Tried and tested technology with proven reliability
- Built-in to simultaneously analyze upto 6 gases
- Scalable ranges available for each gas
- Wide range of gas selectivity
- Compensated for temperature and pressure of media
- Isolated 4-20 mA analog output per each gas
- RS 485, MODBUS protocol
- Auto & semi auto calibration facilities
