TEXTILE

Textile has been backbone of our Indian fashion and clothing culture. It has been one of the oldest and ever-growing industry of India. In the era of evolving clothing needs of India, there is a constant desire to deliver quality product in a dynamic market of textile. To fulfill the demand and quality needs of industry, automation has been playing pivotal role. We at Wfsipl has been partner in developing automation needs for various textile application. Some of our work are as follows.

Bleaching Machine.
High Temperature, High Pressure dyeing machine
Power-Frame Stenter
Coating line.

SPECIFICATIONS :

Advantages of Automation in the Textile Industry
Fewer Work Hours for the Same Production
Safer Working Conditions
Higher Quality Product
